DRIVER APP

Real-time tracking (refreshed every 2 to 20 seconds, based on curves and turns) with live speed, journey distance, time and fuel gauge. Switch between map and satellite view, share location via web link or view trips from start location to current point.

INTUITIVE AND USER-FRIENDLY UI/UX

Did you know that now your vehicle can fight back? Amber Shield feature uses artificial intelligence to protect your vehicle. When a threat is detected, the vehicle shuts down the engine, sends an alarming app notification and even calls the fleet manager

WEB PORTAL AND APP

Smart Fleet Management Gps system provides you with a wide range of real-time alerts:

DRIVER APP

Let your drivers download their app for emergency notifications, navigation, driver time sheet management, and more..

INTUITIVE AND USER-FRIENDLY UI/UX

Car mimicking feature-rich dashboard provides you with all the relevant information at a glance: live tracking & speed or top speed for the week, when parked; statistics, fuel levels etc.

WEB PORTAL AND APP

Fleet management Gps system can be accessed via cloud-based web portal or a smartphone app (iOS, Android). Login access levels
